

Subject: [Radio JOVE] You can now run the RSP1B on SDRPlay2RSS
From: "Jim Sky" <radiosky@radiosky.com>

In an uncharacteristic of me spurt of productivity, I have modified Nathan Townes **SDRPlay2RSS** so that it now works with the *RSP1B* and other SDRPlay models. This required modifying the code to run with the newer API 3 by SDRPlay.. So that everything still communicates, the name of the exe file has stayed the same. Simply download the new exe from

<https://radiosky.com/spec/SDRPlay2RSS.exe>

The default install Directory for SDRPlay2RSS.exe is *C:\Program Files(x86)\Spectrograph\SDRPlay* Rename the old version SDRPlay2RSS.exe to something like *API2_SDRPlay2RSS.exe*, just in case there is an issue with this new version. Save the file you downloaded to this directory. The changes you might notice will be minor except for the Goth segment there is now a dark mode available under the file menu

Please let me know if it does or does not work for you.

For those who are already using SDR Console with their RSP1B, this change is completely optional. Only do it if you want a simpler startup.
