To: Dave Typinski <davetyp@typnet.net>

Ok, You'll need to download and install the latest version of RSS. 2.8.30 I have 2 files attached to this email. They will both need to go into the Spectrograph folder, ---> SDRPlay folder. They will replace 2 files already in there so if it says something about "replacing" tell it yes.

Both these files have a .txt on them. The SDRPlay2RSS is an .exe file.

The mir_sdr_api.txt is a .dll file

You'll need to change them. The .txt is so they don't get stripped by ISP's.

Make sure only the new files are in the SDRPlay folder.
