Hi Dave,

I've uploaded the SDRPlay program and files to my [web space](#). To install, copy the program file and DLLs to a directory and set up desktop and/or start menu shortcuts for the program files with the working directory filled in to where you would like the program to read and write configuration (settings) files. There is incomplete documentation at [this link](#). Even if you have not received the SDRPlay units, but you can still set up data directories and exercise the user interface. The rf input does not require much signal intensity. It is easy to over power the input to the degree that it looks like there is no signal at all.

Let me know how it goes.

Nathan
